SKILLS

Technical Skills

- Programming/Query-Non Query Languages – *Python, DAX, SQL, Javascript*
- Data Analysis – **Power BI**, *Pandas, NumPy, Matplotlib, Seaborn*
- Data Engineering – *Microsoft Fabric, PySpark, Snowflake*
- MLOps – *Scikit-Learn, TensorFlow, PyTorch*
- Softwares/Web app – *Excel, Powerpoint, Words*

Professional Skills: Punctuality, Curiosity, Presentation, Communication, Problem Solving.

Language Skills: Bangla (Native), English (Bilingual), French (Beginner), Italian (Beginner)

EXPERIENCE

Data Analyst Intern - Data Crafters

Nov 2024 – Feb 2025

- ✓ *Performed data modeling, validation, and cleaning to ensure high-quality data for analysis.*
- ✓ *Discovered patterns and trends to generate actionable insights using Power BI, DAX.*
- ✓ *Fetches data from multiple sources and optimized data pipelines using Microsoft Fabric.*
- ✓ *Automated workflows and repetitive tasks with Power Automate to improve efficiency.*
- ✓ *Built dynamic dashboards and reports to support data-driven decision-making.*

EDUCATION

Bachelor of Science in Computer Science and Engineering
[Brac University](#), Dhaka

Jan 2020 – June 2024

PROJECTS

Ticket Analysis | *Power BI, DAX, SQL*

Developed a Power BI report to analyze ticket validity (valid/invalid), status tracking (Completed, In Progress, To Do), and priority levels for better workflow management.

Technician Performance & Training Insights: Assessed technician efficiency, identifying complex tickets requiring additional training to enhance resolution times.

Operational Optimization: Provided data-driven insights into ticket trends, enabling improved resource allocation and proactive issue resolution.

Territory Analysis using RLS-PowerBi | *Power BI*

Developed a Territory Analysis report in Power BI, implementing Row-Level Security (RLS) to ensure managers can access data only for their assigned regions, enhancing data security and role-based insights.

Audio Shop Data Analysis | *Pandas, SQL, Power BI*

Utilized Python (Pandas), SQL, and Power BI to analyze an audio shop dataset. Cleaned and filtered data to identify top-spending customers, genre popularity by country, and playlist trends. Generated actionable insights, such as potential cities for events and high-value artist partnerships, improving targeted marketing strategies.

CRM-Sales | *Power BI*

CRM Sales Dashboard: Built a Power BI dashboard to track sales performance, pipeline, and lead conversions.

Customer Insights: Analyzed top customers by revenue and performance trends.

Trend Analysis: Visualized monthly sales growth and KPI changes for decision-making.

Interactive Reporting: Enabled filters, drill-through, and real-time updates for better insights.

Pizza Sales Report | *SQL, Power BI*

Developed a comprehensive report on pizza sales for a restaurant, analyzing data from 2015. Utilized SQL and Power BI to visualize key metrics, including **total revenue**, **average order value**, **total pizzas sold**, **total orders**, **average pizzas per order**, and **daily and monthly trends in total orders**, **sales by pizza category** and so on.

RESEARCH

Performance Comparison of Transformer-based Models for Multi-Reasoning in Machine Reading Comprehension | *Brac University Under-graduation Thesis 2024* -- Exceed the official Cosmos dataset accuracy by 7%, reaching a performance level of 75%.
